

(c)ITM315 LAB-2

Connect to the LAB Server as follows:

- i. Open your browser, go to <https://vapps.ryerson.ca> then logon with your Ryerson credentials
- ii. Under the “APPS” tab, click the ITM315_RDP, then click “Connect”
- iii. In the second screen type in: **itm315domain\adminxxx** (Where xxx is your assigned number).
- iv. Enter your initial password: Passwordxxx (again xxx is your assigned number).
- v. **Obtain screenshots for the commands you use and the results you obtain and include them in your report.**
- vi. **Highlight the relevant results or write them below your screenshots**
- vii. Logoff your session, when you are done

1) Use the FSUTIL utility (utility means more than just a command, it is like an application by itself that has its own sub-commands) to:

- a. Show the options available to use with this utility
- b. Determine the available drives in the lab server
- c. Display information about volume G: and determine its file system type

2) The Get-Volume Cmdlet has many options:

- a. Show the options available to use with this Cmdlet
- b. Use the Cmdlet to get information about drive G
- c. Compare the results you obtained in Q-1c with the results of Q-2b

3) Using the GUI:

- a. Determine the Disk Interface technology of Drive G (Interface technologies are listed in page 122-124)
- b. Determine the first install date of drive G

4) Explain the different features of Storage Spaces in Windows Server 2102/R2.
